

## Discover a real breakthrough in airbrush paint: **Wicked Colors** *Airbrush Colors for ALL Professionals*

---

- **Superior Flow & Atomization for Amazing Detailed Line Control**
  - **No Grainy Over-Spray**
  - **No Tip Dry**
  - **Multi- Use. Excellent on any substrate and all applications: t-shirt, automotive, illustration, signs, wall mural, exterior & interior artwork**
- 
- Sprays straight out of the bottle through larger tip-sized airbrushes or reduced for use with small tip-sizes, perfect for illustrators and detailed muralists. Wicked Colors also work excellent with spray-guns, a 1.2mm tip-size is recommended.
  - Reduce with W100 Wicked Reducer or Auto Air 4011 Flash Reducer.
  - Operating PSI varies depending upon tip-size and use. Reduce accordingly.
  - Detailed airbrushes with 0.2mm tip sizes and smaller requires reduction @ 25% per volume. Reduction ratios may vary per color depending upon preference.
  - Top coat may be applied. Wicked Colors are compatible with catalyzed, urethane clears as well as most other types including lacquer, acrylic enamel, water-based & more. Top-Coating is not necessary for t-shirt, interior or light exterior applications.
  - Wicked Colors are lightfast and durable. Pigments are exterior grade with a Blue Wool Scale (BWS) rating of 7 to 8 out of 8 meaning they will not fade even when exposed to direct light over extended durations. The acrylic binder is very durable, intended for exterior applications without top-coating and is water-resistant after curing.
